

Getting started Guide

SnapJam is a Social Networking Site wrapped around Music. We help you Connect, Collaborate and Compose High Quality Music with your Friends.

First Step: Register for an account. Once you have registered you will receive an email with a link to verify your account. After clicking the link you will be able to sign in.

Once Inside Your Account: After you have signed back into your account it is time to review the tool bar (see below).

The Lab: The Lab is the main area for Music Creation Collaboration and Mixing of all of your sounds. In the Lab you can access the mixer (See Below).

Here in the Lab you Add Music by dragging and dropping from it your computer to the center of the screen or from the right hand side of the mixer. You can also add music from the Sound Bites Section, your Microphone, the Electronic Instruments Section, the DAW Section and the Loops Section (These will be discussed Individually below). You also have the capability from within the Lab to go to the Lyric Genie, and the Video Section (both to be discussed individually below).

Mixer: As shown here this takes you to the Mixer from anywhere in the Lab.

- You can delete any sounds in the Mixer with a right click.
- You can click on any track in the Mixer and grab the box on either end of the highlighted track to shorten or lengthen the track.

- You can also increase or decrease the sound of a track by highlighting the track and increasing or decreasing the volume by using the “up” or “down” arrow or typing in a volume control number.

Synthesizer: This tool allows you to create great background tracks to import into the mixer using a series of pads. Options such as choosing different drum kits and effects allow for a wide range of sounds and styles.

Lyric Genie: Here you have the capability to use the “Lyric Genie” to help you build Lyrics through the use of Artificial Intelligence and save your Lyrics.

Video: Here you have the ability to upload a video. Once uploaded you can view your videos in the “Video” Section of “Your Account”. You also have the ability to add the Video to your Music within the Music Section.

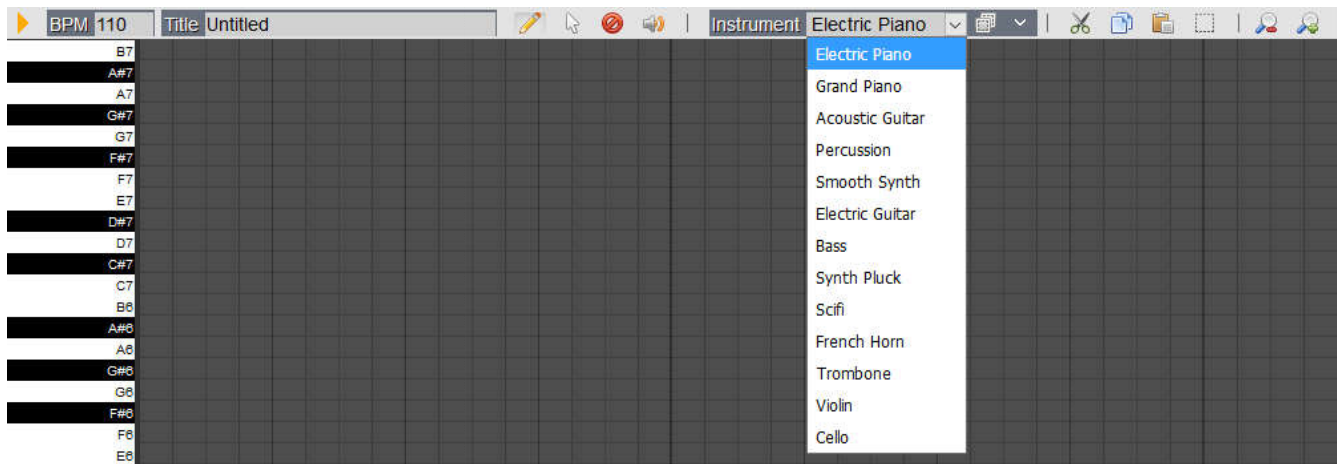

Mic: This section lets you record audio from a microphone, or from any instrument that can be plugged into the Mic input of your computer.

- Name your song and move your song into the right side of the Mixer.
 - You can then add your song into the Mixer by either “Dragging” or hitting the  button.
-

Electronic Instruments: By entering the “Electronics Instrument” area you are able to play 13 instruments. You can “Save” your Music so finish later or hit the “Save Mixer” button and move directly into the Mixer.

DAW (Digital Audio Workstation): This feature has been merged into the Mic section.

Tutorials: Here you can open an interactive tutorial that shows you the main functions of the Mixer.

Sound Bites: Here you are able to choose from 100's of Sound Bites that you can hit the "Add" button and have them added to right side of the Mixer.

- Once on the right side of the mixer you can "drag" or hit the  button and have it added to the Mixer.

- You can also “Delete” a “Sound Bite” from the right side of the Mixer by hitting the  button.
-

Sound Loops: Here you are able to choose from a library of “Loops” that you can hit the “Add” button and have them added to right side of Mixer.

- Once on the right side of the mixer you can “drag” or hit the  button and have it added to the Mixer.
 - You can also “Delete” a “Sound Loop” from the right side of the Mixer by hitting the  button.
-

Initiate Collaboration: When you click on the “Initiate Collaboration” button it allows you to see Friends that are online that you had previously “Followed”. Once you click on the “Initiate Collaboration” button and click on a “Friend” you will receive a “You have an Invite”. Once you accept this invitation you will be able to see, talk with, and collaborate with your friends in the Mixer.

Open Draft: Also within the Lab you have the capability to open a draft. This lets you open music that you have previously saved but where not finished composing.

Save Draft: This button lets you save an unfinished project so you can come back to it later.

Download: This button lets you download your project as an MP3 file.

Publish: This button publishes your project to your Music section so others can listen to it and comment about it.

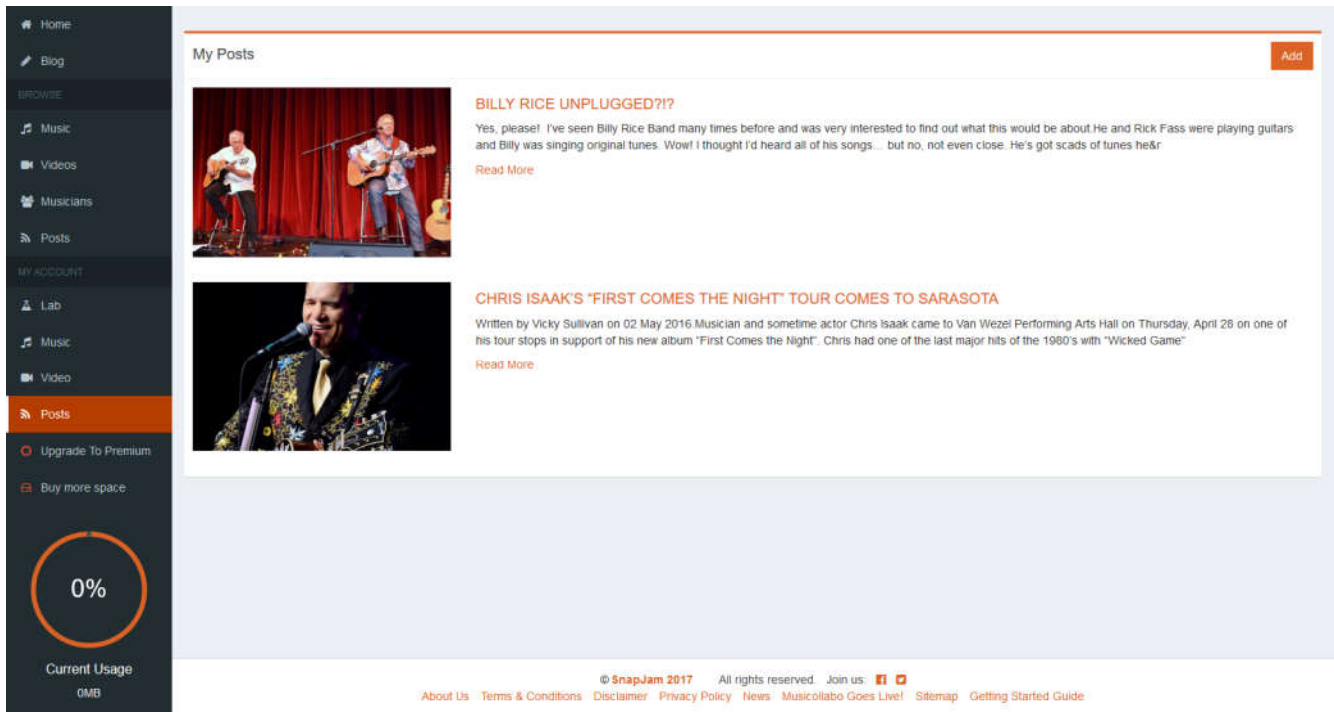

Tutorial: This button opens an interactive tutorial that shows you the main functions of the currently open section of the Lab.

Music: When you enter the “Music” section are you able to review the songs you have made. You can also Like a song, you can Publish a song to Facebook, YouTube, Twitter and Instagram. You can add a video from your Video Library you can also add “Lyrics” to you song. All the buttons are clearly identified below on the snapshot of the “Music” Page In this case No Lyrics have been added to this song.

Video: When you enter the “Video” section you are able to add Video to this part of Your Account. You do this by clicking on the “Add” button in the upper right hand corner.

When you click on the “Add” button you will be taken to the “Add Video” page where you will be able to add your video by attaching then uploading your video.

Posts: Here in the “Posts” Section you are able to Comment, Blog and watch you favorite Real Time Genre News.

Inbox: The Inbox provides and area to receive announcements and information about Prizes, Giveaways and new and Exciting Features.

Friends: Here in the “Friends” Section to have the ability to “Follow” and become “Friends” with other members. You can either “Follow” a member you know by entering their name or email id or by using our Powerful Search Engine to find your “Friend”.

Settings: Here in the Settings area you can update your username, email, profile picture and other information.
